

Day 3 - September 13th - Friday

Panel 4 - Industry Engagement: how industry could engage in climate change mitigation based on sustainability criteria and a vision of future

Panelists: Invited Speakers and G20 HoA, 10 minutes each

Moderator: Mr. Paolo Gessini (AEB Director of Strategic Intelligence & New Business)

9:00

10:30

This panel will discuss the important role that space industry can play in addressing climate change. It will focus on how innovation stemming from the space sector can help create a more sustainable future. By looking at industry methods, future policies and development goals, the panel will identify issues and pinpoint opportunities for space technology and services to work together towards mitigating climate change by helping to enforce sustainability standards.
